PROFESSIONAL SUMMARY

Results-driven and detail-oriented aspiring software and web developer with a strong background in mathematics, programming, and technical problem-solving. Skilled in HTML, CSS, JavaScript, C, and embedded systems programming, with solid knowledge of software engineering principles, analytical reasoning, and critical thinking. Demonstrates excellent quantitative, logical, and problem-solving abilities developed through advanced mathematical training and practical technical projects. Adept at working collaboratively in team environments and committed to continuous learning, innovation, and professional growth. Seeking opportunities to apply technical expertise and mathematical skills to contribute effectively to organizational success in the technology industry.

AWARDS & ACHIEVEMENTS

- 2nd Place, SentryLink, UMaT Innovation & Career Fair 2026 (Jul 9-10)
- 1st Place, Build with AI Competition, Takoradi Technical University (TTU)

SKILLS

Web Development Software Development Problem Solving & Analytical Thinking Mathematics & Quantitative Analysis Critical Thinking Team Collaboration Communication Skills Research & Technical Writing Embedded Systems Programming Debugging & Troubleshooting

SOFTWARE SKILLS

HTML5 CSS3 JavaScript C Arduino IDE MikroC for PIC Microsoft Office Suite Git & GitHub Visual Studio Code emu8085 Simulator

WORK EXPERIENCE

Mathematics, Science and Computing tutor

Comfort Academy, Opfam school complex and Saint Francis of Assisi | January 2021-present

- Work Experience Mathematics, Science & Computing Teacher Comfort Academy 2021-2024 Taught Mathematics, Science, and Computing to junior high school students.
- Prepared and guided students for the BECE examinations, achieving excellent academic results.
- Developed lesson plans, class assessments, and interactive learning activities to improve student understanding and performance.
- Mentored students academically and promoted discipline and confidence in learning.
- Mathematics, Science & Computing Teacher Opfam School Complex 2025-Present Teaching Mathematics, Science, and Computing at the basic school level.
- Preparing students for academic excellence and national examinations through effective teaching methods and continuous assessment.
- Integrating technology and practical examples into lessons to enhance student engagement and understanding.
- Supporting students' academic growth through guidance, motivation, and individualized attention.
- Teaching Intern Saint Francis of Assisi School 2025 Assisted in teaching Mathematics, Science, and Computing during internship training.
- Supported classroom management, lesson delivery, and student assessment activities.
- Collaborated with senior teachers to improve teaching strategies and learning outcomes.
- Gained practical classroom experience and strengthened communication and leadership skills.

EDUCATION

University of Mines and Technology

Computer science and engineering | 2026

RESEARCH PROJECTS

DEVELOPMENT OF AN INTEGRATED HAIRSTYLE VISUALISATION AND SELECTION MODULE USING PROGRESSIVE WEB APPLICATION TECHNOLOGY

Dr Ezekiel Mensah Martey | March 2026-present

Research Projects Development of an Integrated Hairstyle Visualisation and Selection Module Using Progressive Web Application Technology Team Research Project University of Mines and Technology 2026 Collaborated in the design and development of a Progressive Web Application (PWA) aimed at modernising barbershop service delivery in Ghana. Contributed to the integration of real-time hairstyle visualisation using OpenCV, MediaPipe Face Mesh, and AI-powered image generation technologies. Participated in developing modules for location-based barber discovery, skill-based barber matching, appointment scheduling, and inapp messaging. Assisted in implementing frontend and backend technologies including React.js, Node.js, MongoDB Atlas, Firebase, and Google Maps API. Applied Agile Scrum methodology throughout the software development lifecycle, including system design, testing, deployment, and user evaluation. Conducted research and analysis on AI-based hairstyle visualisation systems, recommendation algorithms, and Progressive Web Applications within the Ghanaian context. Contributed to technical documentation, system architecture design, database modelling, and user interface development for the final project report.

RESEARCH INTERESTS

My research interests and academic focus are centered on computer engineering, software development, and applied computing in education and real-world problem solving. I am particularly interested in embedded systems and microcontroller applications, where hardware and software interact to solve practical problems, as well as web development and programming, where I focus on building functional, user-friendly digital systems. In addition, I have a strong academic focus on computational thinking, algorithm design, and assembly language programming, which helps me understand how systems operate at a low level. I am also interested in educational technology and how computing can be used to improve teaching and learning in subjects like mathematics, science, and basic programming. Overall, my goal is to combine software engineering, embedded systems, and education-focused computing to develop solutions that are both technically strong and impactful in real-world learning environments.

LANGUAGES

English (Fluent) Fante (Native/Fluent)

INTERESTS

My interests and hobbies include exploring technology and computer programming, especially learning how software and hardware systems work together. I enjoy coding projects, building simple web applications, and experimenting with different programming languages to improve my skills. I also have a strong interest in teaching and mentoring students in mathematics, science, and computing, which allows me to share knowledge and help others understand difficult concepts more easily. In my free time, I enjoy solving logical puzzles, working on academic problems, and reading about new developments in technology and innovation. Additionally, I like engaging in continuous learning activities that improve my problem-solving and critical thinking skills, as well as participating in group discussions and collaborative projects.
